

## History of Biology by L. C. Miall

*Read by J. M. Smallheer*

### History of Biology 1911 By L. C. Miall

A history of biology from ancient times to Darwin and Pasteur by Louis Compton Miall, Professor of Biology, Fellow of the Royal Society, Fullerian Professor of Physiology and Comparative Anatomy at the University of Leeds. This book covers all the major advances in botany and zoology through the mid-1800's and concludes with the impact that Darwin's "Origin of Species" and Pasteur's research into microorganisms will have on future generations of biologists.

*"Science knows no country, because knowledge belongs to humanity, and is the torch which illuminates the world." – Louis Pasteur*
